

With BRCCS, it's truly about meeting the needs of the end users – our soldiers.

“The bottom line is automation and standardization, which generates fewer mistakes. With fewer mistakes, you'll get more of your contracts through the invoicing and payments steps smoothly.”

— MAJ Reggie Terry, Administrative Contracting Officer, Coalition Provisional Authority, Al-Hillah, Iraq

“SPS reduces administrative tasks by automating the procurement process allowing soldiers to concentrate on what's really important in a contingency situation: direct Warfighter support.”

— COL Jacob Haynes, SPS Program Manager

“It used to take about two-and-a-half hours to get a purchase order into a vendor's hands. Now, they've got it down to about 10 minutes.”

— MAJ Kenneth Buck, Logistician, Army National Guard (Active Guard Reserve)

A Logistics Multiplier

**Introducing BRCCS:
Battle Ready Contingency Contracting
System**

The cornerstone of DoD's end-to-end procurement process. On the laptop and on the go.

For more information about BRCCS, visit

www.spscoe.sps.eis.army.mil.

Supporting America's Warfighters

BRCCS, a mobile, automated procurement system used by the Department of Defense (DoD), has paved the way for faster and easier contingency contracting. Used successfully around the world, BRCCS manages procurement with ease and brings efficiency to some of the most challenging settings.

Increasing Total Asset Visibility

On the battlefield, there's a lot at stake. Every minute counts. With BRCCS, supplies and services can be ordered in advance or on the fly – without a paper trail to weigh you down.

BRCCS augments logistics systems by:

- Gaining real-time visibility of items at various locations
- Tracking procurement through one system
- Automating all steps of procurement
- Providing reliable connectivity in contingency environments.

For military operations and disaster or emergency relief, BRCCS literally gets soldiers and other personnel ready for action – in advance or in real time. This sophisticated contracting and procurement system runs seamlessly on a laptop or a standalone desktop:

- Gets America's Warfighters what they need, when they need it
- Saves time and money
- Fulfills orders and changes faster
- Interfaces with 32+ systems across the DoD
- Reduces paperwork, increases e-logistics
- Provides logistics intelligence real time

BRCCS is a logistics multiplier:

- Reduces military footprint
- Augments organic capability with contract support
- Reduces strain on transportation systems
- Supports logistics/supply systems

PD2: The Brains Behind BRCCS

Procurement Desktop-Defense (PD2), the software application used by BRCCS, adds more power to procurement. Consistently updated with new features and functionality, PD2 gives logistics professionals the tools needed for faster, more efficient procurement.

- Currently used by the Army, Navy, Air Force, Marines, and 13 other defense agencies
- Will replace 70+ legacy systems, offering huge cost savings and consistency across the DoD
- Used to procure more than \$48B in goods and services in FY03

**From MHEs to MREs and
medicine, BRCCS will help you
balance out supplies and put
them where they're needed.**
